SUPPLEMENT TO
REPORT NO.

THIS IS UNEVALUATED INFORMATION

SOURCE

25X1X

1. On 31 January 1951 a set with two braced rectangular frames fitted on rods was observed about 50 meters north of the [REDACTED]. The set rotated slowly. * Two rubber-coated cables led from the set to the [REDACTED] from where the noise of an engine was heard. Local residents stated that the set was erected during the fall of 1950. The personnel assigned to the set was composed of one officer and eight soldiers. They reportedly wore navy uniforms. They were said to be detached from a unit stationed in Gassnitz. **

2. During the period [REDACTED] the radar set on Fahrenberg Hill southwest of Binz was observed in operation. A double wire line led from the barracks to Binz where it was said to have been connected to the local telephone line. ***

See Annex for location of set.

The set is reported for the first time. It is believed to be a radar set of the same type as or of a type similar to the two-car radio set observed in the Soviet Zone with fighter division headquarters. The set presumably belongs to a navy unit.

The same radar set was reported on previously. It is also a radar set with two ears and seems to belong to a navy unit. Air Force units have not been reported as being stationed on Ruegen Island.

1 Annex: sketch on ditto.
